Listing details

Title: 1978 1/2 280Z Original Owner

Description: My wife learned to drive in this California car back in '78! It is a late 1978 280Z with an original/stock 1979 engine installed by the factory during Datsun's transition to the newer 1979 280ZX body style. My Father in law gifted it to us back in '85 when we got married and we have driven it on and off in Florida ever since. This car has never seen snow and salt covered roads, but it HAS had it's share of rust! The original, serial# matching power plant still runs great, but the electrical system has seen better days. I replaced the hood, the interior, the alarm & radio as well as several rusted panels and did a complete repaint completed in January of 2013, but quite frankly, I am over it! If you want to complete a wonderful project or just need a great engine this is the car for you.

Owner Information

Account address on the maps: No
City: Margate
